

COMMERCIAL PROPOSAL & QUOTATION

Travel Web Platform & CRM Solution

A bilingual travel booking website connected to a practical back-office CRM, designed to manage content, customers, bookings, quotations and operations in one workflow.

ONE-TIME IMPLEMENTATION INVESTMENT

EGP 250,000

Web Application: **EGP 150,000** • CRM & Back Office: **EGP 100,000**

PREPARED FOR

**Prospective Travel Agency
Client**

REFERENCE

SWH-SOFTWARE-2026-001

VALIDITY

30 days from issue date

One connected travel business platform

The proposal combines the public website that inspires and converts travellers with the internal CRM that turns enquiries into confirmed bookings, financial documents and organised travel operations.

Public Web Application

English and Arabic customer experience, responsive on mobile and desktop, with travel content and booking journeys.

CRM & Back Office

Role-protected operational workspace for the travel team to manage the catalogue, customers, quotes, bookings, documents and tasks.

Commercial summary

Implementation quotation — Egyptian Pounds (EGP)	
Section 1 — Travel Web Application	EGP 150,000
Section 2 — CRM & Back Office	EGP 100,000
Total project investment	EGP 250,000

Scope boundary: The stated price covers the software functionality described in this quotation. Paid third-party services, payment-gateway charges, hosting, domain fees, bulk data entry and VAT (where legally applicable) are outside this implementation price unless separately agreed in writing.

Travel Web Application — EGP 150,000

A customer-facing travel website that presents the agency's catalogue clearly, helps visitors discover relevant experiences, and guides qualified travellers into booking requests.

Home & navigation

Hero content, featured destinations, tours, packages and blogs; responsive navigation, mega menus, language and currency controls.

Destinations & cities

Destination and city listing/detail pages, image galleries, contextual city discovery, related tours and human-readable URLs.

Tours & Nile cruises

Searchable listings with filters, price/discount presentation, tour detail galleries, itinerary, availability context and booking entry point.

Holiday packages

Package discovery, date and search filtering, detail pages, itineraries, inclusions, related tours, price and booking journey.

Blogs & travel content

Article index and detail pages with bilingual content sections, imagery and SEO-ready page structure.

Accounts & reviews

Registration, sign-in, profile and booking history; completed-trip review workflow to support trustworthy customer feedback.

Booking experience

Traveller counts, dates, special requests, active discounts, price calculation and a booking request hand-off to the CRM team.

SEO & performance foundation

Server-rendered public routes, metadata, canonical URLs, sitemap-ready structure, bilingual routing and responsive layouts.

Web application deliverables

- ✓ Responsive experience for laptop, tablet and mobile.
- ✓ English/Arabic content presentation with right-to-left Arabic layout.
- ✓ Shared catalogue data for destinations, cities, tours, packages, blogs and reviews.
- ✓ Connected booking flow that creates actionable requests for the operations team.

Customer journeys included

Journey	What the traveller can do	Business outcome
Explore	Browse destinations, cities, tours, Nile cruises, packages and blog content in the selected language.	Turns travel inspiration into relevant product discovery.
Compare & decide	View images, itineraries, inclusions, availability information, prices and active discount badges.	Gives the customer enough context to submit a serious booking request.
Book	Choose travellers and travel dates, provide special requests and submit a booking request after account sign-in.	Creates a trackable booking lead for the CRM and agent team.
Return	Access profile and booking history; submit reviews after completed travel where permitted.	Supports repeat business and credible social proof.

Website catalogue covered

Public catalogue • Destinations • Cities • Tours and Nile cruises • Holiday packages • Blog articles • Customer reviews	Conversion components • Search and filters • Booking forms • Price and discount display • Account access • Related content and recommendations • Contact and enquiry paths
--	---

Online card payment collection is not included in this quotation. The platform handles booking requests and operational confirmation; a payment gateway can be quoted as a separate integration if required.

CRM & Back Office — EGP 100,000

A role-protected internal system for the agency team. It centralises operational work from customer record and quotation through booking, invoice, voucher and follow-up.

Customer record → Travel quotation → Booking management → Invoice → Voucher

Customers & travellers

Customer profiles, company/personal details, contact information and companion travellers for reusable trip planning.

Quotations

Build, edit, duplicate, send and export branded PDF quotations using available tours, packages, hotels, flights and transfer lines.

Bookings desk

Central booking queue with status workflow, cancellation handling, confirmation notes and agent assignment.

Invoices & vouchers

Create financial invoices and operational vouchers with downloadable branded PDF documents for customer and supplier communication.

Catalogue management

Manage destinations, cities, tours, packages, blogs, hotels, airlines, flights and countries from the secure back office.

Tasks & notifications

Operational tasks, follow-up reminders and notification visibility for agents and administrators.

Pricing & promotions

Currency-aware product pricing, capacity controls and date-bound discount campaigns for tours and packages.

Inbox & control

Contact-message handling, publication status controls and authenticated access for administrative and agent workflows.

Operational modules included

Module	Core capability	Connected outcome
Customer management	Profiles, contacts, company data and travellers.	A single customer record follows the complete sales and service journey.
Quotations	Catalogue-based lines, pricing, terms, versions, sending and PDF output.	Faster, consistent commercial proposals.
Bookings	Request review, status tracking, customer updates, assignment and cancellation workflow.	Clear ownership from web lead to completed trip.
Invoices	Invoice creation, line items, totals, payments context and PDF download.	Standardised financial communication.
Vouchers	Supplier/travel service voucher records for flights, hotels, tours and packages.	Operational handover documents for the trip.
Travel catalogue	Destinations, cities, tours, packages, hotels, airlines, flights, blogs and discount campaigns.	The CRM and website always use one managed content source.
Tasks & messages	Agent tasks, follow-up notifications and contact-message inbox.	Less missed follow-up and better internal coordination.

Roles and access

The back office is protected by authentication and role controls. Administrators manage configuration and visibility; agents work with their assigned bookings, customers, tasks and operational follow-up according to access rules.

Quotation

Section	Included scope	One-time price
1. Travel Web Application	Public bilingual website, destinations, cities, tours, packages, blogs, reviews, accounts, booking requests and SEO-ready public experience.	EGP 150,000
2. CRM & Back Office	Customers, travellers, quotations, bookings, invoices, vouchers, catalogue management, discounts, tasks, notifications and contact messages.	EGP 100,000
Total implementation investment		EGP 250,000

Included ✓ Implementation of the listed software modules ✓ Responsive web interface and CRM interface ✓ English/Arabic presentation where described ✓ Branded quotation, invoice and voucher PDF outputs ✓ Acceptance testing and handover of the agreed scope	Not included unless agreed separately ✓ Online payment-gateway fees and integration ✓ Hosting, domain and paid third-party subscriptions ✓ Large-scale data migration or content entry ✓ New modules outside this scope ✓ Taxes where legally applicable
