

Sea World Holidays — Web Platform

System overview, page inventory and cost per page.

Angular 22 SSR platform · bilingual English / Arabic · 47 pages · Document version 2.0

1. Pricing model

Every page of the system is priced as a unit of delivery. A page includes its layout, data loading, English and Arabic content, RTL handling, loading and error states, responsive behaviour and QA.

Rule	Hours	Price (EGP)
Standard page — home, catalogue, content, account and admin screens	5	5,000
Tour page — extra depth: gallery, itinerary, reviews, availability and booking	8	8,000

The blended engineering rate is **EGP 1,000 per hour** (about USD 21), so a 5,000 EGP page is five hours of work and an 8,000 EGP page is eight.

2. What the system does

Sea World Holidays is a bilingual travel platform with three audiences on one codebase:

- **Visitors** browse destinations, cities, tours, Nile cruises, packages and travel articles, then request a booking.
- **Customers** sign in to track their bookings, invoices and profile, and to review completed trips.
- **Staff (Admin / Agent)** manage the whole catalogue, the booking queue and the financial documents from a back office.

Every public page is server-rendered for search engines, carries structured data and breadcrumbs, and is available on both `/en/...` and `/ar/...` with automatic right-to-left layout.

3. Sections and pages

3.1 Catalogue & content — the public shop front

The revenue-generating pages. Visitors search and filter inventory, view rich product pages and start a booking. Tour pages carry the deepest functionality, which is why they are priced higher.

Page	Route	What it does	EGP
Home	<code>/home</code>	Hero slider, featured destinations, tours, packages and articles, live company statistics	5,000
Destinations listing	<code>/destinations</code>	Paginated destination index with per-card image carousels	5,000
Destination detail	<code>/destinations/:slug</code>	Gallery and lightbox, related tours carousel, cities of the destination	5,000
City page	<code>/cities/:slug</code>	Top tours in the city plus recommended tours from the wider destination	5,000
Tours listing	<code>/tours</code>	Search with autocomplete, travel date-range filter, pagination, discount badges	8,000
Nile cruises	<code>/nile-cruises</code>	Cruise-only catalogue with the same search and filtering	8,000
Tour detail	<code>/tours/:slug</code>	Gallery and lightbox, key facts, pricing, itinerary timeline, reviews, booking card	8,000
Packages listing	<code>/packages</code>	Search, date filter and pagination over holiday packages	5,000
Package detail	<code>/packages/:slug</code>	Gallery, itinerary, inclusions, related tours, reviews and booking card	5,000
Blog listing	<code>/blogs</code>	Article index with cover images, dates and excerpts	5,000

Page	Route	What it does	EGP
Blog article	/blogs/:slug	Bilingual sectioned article with gallery and safe link rendering	5,000
Subtotal — 11 pages			64,000

3.2 Information & support

Trust and service pages. Lower complexity, but each still needs bilingual copy, RTL layout and SEO.

Page	Route	What it does	EGP
About us	/aboutus	Company story, mission, team and statistics	5,000
Contact us	/contact	Contact form posting to the back office, office details and map	5,000
Help center	/helpcenter	Support landing page with topic navigation	5,000
FAQs	/helpcenter-faqs	Grouped, expandable question and answer lists	5,000
Guides	/helpcenter-guides	How-to guides for booking and travelling	5,000
Support	/helpcenter-support	Support request form and contact channels	5,000
Terms & conditions	/terms	Legal terms in both languages	5,000
Privacy policy	/privacy	Privacy and data handling policy	5,000
Subtotal — 8 pages			40,000

3.3 Account & authentication

The customer's private area. Every page here is behind a guard, excluded from search engines, and needs form validation, session handling and error messaging in both languages.

Page	Route	What it does	EGP
Sign in	/login	JWT login with return-URL handling after a booking attempt	5,000
Sign up	/signup	Registration form with validation	5,000
Sign-up success	/signup-success	Confirmation and next-step guidance	5,000
Account activation	/account/activate	E-mail activation link handling	5,000
Forgot password	/forgot-password	Reset request by e-mail	5,000
Reset password	/reset-password	Token-based password reset	5,000
My profile	/user-profile	Personal details and account overview	5,000
My bookings	/user-booking	Booking history with status, totals and review submission	5,000
Account settings	/user-setting	Password change and preferences	5,000
Payments	/user-payment	Saved payment methods screen	5,000
Invoices	/user-invoice	Customer invoice view	5,000
Social accounts	/user-social	Linked social profiles	5,000
Notifications	/user-notification	Notification preferences	5,000
Subtotal — 13 pages			65,000

3.4 Back office (configuration)

Admin and Agent screens. Each is a full management module: paginated listing, create and edit forms, validation, status changes and guarded deletion. Tours and Bookings are priced higher because they carry the image pipeline, itinerary builder, discounts and the booking status workflow.

Page	Route	What it does	EGP
Destinations	<code>/configurations/destinations</code>	Manage destinations, images and publication status	5,000
Cities	<code>/configurations/cities</code>	Manage cities under each destination	5,000
Tours	<code>/configurations/tours</code>	Tour authoring: details, image pipeline, itinerary builder, discounts	8,000
Packages	<code>/configurations/packages</code>	Three-step package wizard with images, itinerary and discounts	5,000
Hotels	<code>/configurations/hotels</code>	Hotel records used by packages and vouchers	5,000
Airlines	<code>/configurations/airlines</code>	Airline reference data	5,000
Flights	<code>/configurations/flights</code>	Flight records used by quotations and vouchers	5,000
Blogs	<code>/configurations/blogs</code>	Bilingual article editor with sections and image management	5,000
Customers	<code>/configurations/customers</code>	Customer records and history	5,000
Bookings	<code>/configurations/bookings</code>	Booking queue, status workflow, cancellation fees, agent assignment	8,000
Quotations	<code>/configurations/quotations</code>	Build, send, duplicate and export quotations as PDF	5,000
Invoices	<code>/configurations/invoices</code>	Create, edit and export invoices as PDF	5,000
Vouchers	<code>/configurations/vouchers</code>	Create, edit and export travel vouchers as PDF	5,000

Page	Route	What it does	EGP
Tasks	/configurations/tasks	Internal task tracking with notifications	5,000
Contact messages	/configurations/contact-messages	Inbox for website contact submissions	5,000
Subtotal — 15 pages			81,000

4. Total cost

Section	Pages	Hours	Total (EGP)
Catalogue & content	11	64	64,000
Information & support	8	40	40,000
Account & authentication	13	65	65,000
Back office (configuration)	15	81	81,000
Total	47	250	250,000

Total project cost: EGP 250,000

250 hours at EGP 1,000 per hour · approximately USD 5,150 at 48.5 EGP/USD · roughly 6–7 weeks for one engineer, or 3 weeks for a team of two.

4.1 Price breakdown by page type

Page type	Count	Unit (EGP)	Total (EGP)
Standard pages	42	5,000	210,000
Tour pages (listing, Nile cruises, detail, admin tours, admin bookings)	5	8,000	40,000
Total	47	—	250,000

5. What is included in every page price

- Layout and responsive implementation from the agreed design
- Integration with the backend API, including loading, empty and error states
- English and Arabic content wiring with right-to-left layout verification
- Server-side rendering compatibility, page metadata, structured data and breadcrumbs (public pages)
- Access control and search-engine exclusion (account and back-office pages)
- Manual QA on desktop and mobile, code review and one round of revisions

6. Not included

- Backend / API development and database work
- Online payment gateway integration — the booking flow captures requests, it does not take card payments
- Hosting, domains, SSL and infrastructure
- Original UI/UX design, photography, copywriting and translation
- Content entry for destinations, tours, packages and articles
- Automated test suites and ongoing maintenance or support retainer

Scope control. The price is fixed per page. Adding a page adds 5,000 EGP (8,000 EGP for a tour page). Reworking a page after it has been signed off is quoted separately.

Sea World Holidays — System Overview & Cost per Page · Version 2.0 · 47 pages · EGP 250,000.
Supersedes the effort-based estimate in version 1.0. Valid for 30 days from issue.
